PROJECTS

Full stack Boat Website Clone

- Simplified login and signup for easy access and account creation while ensuring security with rate limiting and JWT tokens.
- Designed and executed a feature-rich **shopping cart** with CRUD operations.
- Created a dynamic product page with **sorting functionality** to allow users to easily sort and arrange products based on various criteria.
- Developed a **RESTful API** to enable seamless product creation and integration on the website, ensuring efficient management and smooth updates of the product catalog.
- Built a product description page with **real-time review feature** for seamless user experience and enhanced engagement.
- **Integrated Stripe checkout** for seamless and secure payment processing, ensuring a smooth transaction experience for customers.

Source Code:  [GitHub](#) Deployed Link:  [Internet](#)

Technology Stack Used: HTML, CSS, JavaScript, ReactJs, Redux, MongoDB, RESTful API, Stripe, NodeJs, ExpressJs, Mongoose

The Coding Community

- Efficiently track and showcase performance with a **dynamic homepage** and interactive **leaderboard**.
- Streamlined **login and signup** process for easy access and account creation **Compilers** that allow user To compile Their Code
- Created a topic-specific DSA question page, enabling users to efficiently practice and solve problems related to different topics.
- **Text editors** for editing and modifying code
- implemented **Authentication** for users
- implemented Dozens of RestApi for different use cases

Source Code:  [GitHub](#) Deployed Link:  [Internet](#)

Technology Stack Used: HTML, CSS, JavaScript, React, Spring Boot, Spring Web, Spring Security, Hibernate, Jpa

Library Management System

- The core aim is to oversee the administration of the library management system.
- Learn to store and retrieve data efficiently using Spring Boot's database management features.
- Create user-friendly and functional APIs for easy interaction with the system.

Source Code:  [GitHub](#)

Technology Stack Used: SpringBoot, SpringWeb, Hibernate, Jpa, Swagger

EDUCATION

Bachelors of Science In Computer Application

St Xavier's College, Ranchi

 July 2020 – Present CGPA: 7.08

Class XII

Adarsh +2 Ucha Vidyalaya

 June 2017 80.00%

Class X

Munam Public School

 June 2015 CGPA: 9.4

SKILLS

COURSEWORK

- Data Structures and Algorithms
- Object- Oriented Programming
- Database Management Systems
- Operating Systems

CERTIFICATIONS

- [JavaScript HackerRank](#)
- [Java HackerRank](#)
- [FrontEnd Development Devsnest](#)

ACHIEVEMENTS

- Securing rank 1 at AccioSat earned me a full 100% scholarship.
- Solved more than 500+ Coding problems on different Platform.
